## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-10, 13-19, 21-45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The term "implanted on a molecular level" was not described in the specification. The term "implanted on a molecular level" is introduced in amendment to the claims filed on 8/16/05 and 3/22/06. Since this term is not defined and described in the original specification. This subject matter is considered to be new matter.

4. The amendment filed 8/16/05 and 3/22/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the term "implanted on a molecular level" is introduced in amendment to the claims filed on

8/16/05. Since this term is not defined and described in the original specification. This subject matter is considered to be new matter.

Applicant is required to cancel the new matter in the reply to this Office Action.
